Tanker Access

TC-10

For more information

Scan the code

The Carbis **TC10-EURO** Mobile Access Cart is designed to provide drivers and operators with a superior, flexible and safe access on to tankers of varying heights, either to sample, inspect or vent the tanker.

Safe, and reliable access onto tanker tops is a subject of increasing concern to all engineers and safety managers involved in the area of bulk liquid transfer.

Constructed in Aluminium, Carbis **TC10-EURO** Mobile Access Carts can be moved around site by one man or a

tractor over longer distances. They are designed to provide access to tankers ranging in height from 2990mm to 5120mm.

- 16" foam filled tyres
- Levelling jacks for secure standing
- Slip resistant surfaces
- Heavy duty raise and lower winch
- Large cage for opening storm covers
- Extended top step area to allow access to middle of ISO-Tankers
- ATEX approved design
- Resistant to most atmospheres and hard wearing
- Can be sited virtually anywhere on a site for convenient tanker access
- Easy mobility over rough terrain
- Virtually maintenance free
- Built from a rolling kit in 2 hours
- Versatile and easy to use
- SIDE MOUNT version available for narrow loading bays
